1. Location: The plant, designated Aircraft Engine Plant by the Soviets, was located northwest of VOLSK (Saratov Oblast), about 2½ miles northwest of the Volga River, 1,500 feet north of the VOLSK (47°25'E/52°02'N) - ALEKSEYEVKA road. It had two or three very large workshops.

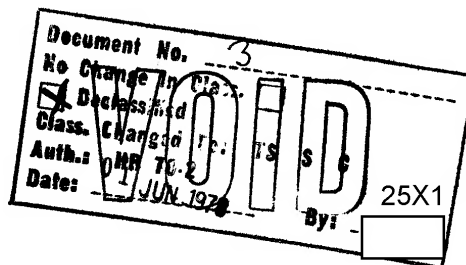

2. The roar of running engines was heard from the plant day and night.

25X1 ☐ Comment :

- a. The location of the plant corresponds to that of the repair plant whose existence was known during the war. According to information of early 1948, the plant continued operating after the war.
- b. The report does not make it clear whether the plant is still a repair plant or whether the production of aircraft has started.
